Nampa, ID 83687

**Subject: The Amalgamated Sugar Company LLC Reuse Permit I-063-03 Permit Modification 1  
Minor Modification, Due Date Extension for CA-063-01**

Dear Mr. Erickson:

On June 23, 2014 the Department of Environmental Quality (DEQ) received a request from The Amalgamated Sugar Company LLC to extend the due date of Compliance Activity CA-063-01 by 60 days. The reason for the request was that the preliminary analysis of monitoring well conditions revealed complex issues which require further evaluation in order to provide for a more complete and comprehensive report.

DEQ has determined that it is acceptable to extend the due date to this compliance activity in order to provide the facility time to do a more comprehensive evaluation. With issuance of the attached minor modification, CA-063-01 will now be due on August 29, 2014. The reuse permit is not complete without this modification attached.

If you have any questions or need further information, please contact Valerie Greear at (208) 373-0459 or [valerie.greear@deq.idaho.gov](mailto:valerie.greear@deq.idaho.gov).

Sincerely,

A handwritten signature in blue ink, appearing to read "Pete Wagner", written over a horizontal line.

Pete Wagner  
Regional Administrator

**MODIFICATION OF INDUSTRIAL REUSE PERMIT  
MODIFICATION 1 TO PERMIT NO. I-063-03**

**Permittee Name:** The Amalgamated Sugar Company LLC

**Effective Date of this Modification:** June 25, 2014

**Complete Description of Modification**

The purpose of this Permit Modification is to extend the due date of Compliance Activity CA-063-01 by 60 days.

The first line item in Section 3 of the Reuse Permit I-063-03 shall be replaced with the following:

<b>Compliance Activity (CA) Number and Completion Due Date</b>	<b>Compliance Activity Description</b>
<p>CA-063-01 August 29, 2014</p>	<p><b>Monitoring Well Network Analysis:</b> A monitoring well network analysis shall be conducted and shall include, but not be limited to, the following items:</p> <ol style="list-style-type: none"> <li>1. Evaluate the Monitoring Well Network: Based on the ground water flow paths through the facility, verify that the network of permitted monitoring wells (listed in Table 5.2.1) are properly located (including depth) to adequately monitor the effects of pond seepage, land application activities, and other facility activities on ground water quality. If the monitoring well network is not sufficient to determine up-gradient and down-gradient ground water conditions, both for the site and individual sources, additional wells may need to be added and/or constructed.</li> <li>2. Procedure to validate the construction and condition of existing monitoring wells: Determine a procedure to validate the construction and condition of all existing wells that were identified in item 1 as being necessary in monitoring ground water. The monitoring wells shall be constructed as specified in the Rules for Well Construction (IDAPA 37.03.09).</li> <li>3. If, based on the findings of items 1 and 2 above, additional wells or reconstruction or modifications of existing wells are recommended, permittee shall define field activities, which will require DEQ review and approval prior to well installation, reconstruction, or modification, and use. The monitoring wells shall be constructed, reconstructed, or modified as specified in the Rules for Well Construction (IDAPA 37.03.09).</li> </ol> <p>Submit a report with the results of the analysis and proposed recommendations for DEQ review and approval.</p>

The Amalgamated Sugar Company LLC  
Reuse Permit I-063-03 Modification 1
