Mr. Jim Smith, Vice President  
POE Asphalt Paving Inc.  
P.O. Box 449  
Lewiston, ID 83501

RE: AIRS Facility No. 777-00170, POE Asphalt Paving Inc., Portable  
(Portable Hot-mix Asphalt Plant)

Dear Mr. Smith:

The Idaho Department of Environmental Quality (Department) is issuing Permit to Construct No. 777-00170 to POE Asphalt Paving Inc. in accordance with IDAPA 58.01.01.200, *Rules for the Control of Air Pollution in Idaho*. The enclosed permit is based on the information contained in your application, received December 4, 2001. This action terminates Tier II Operating Permit No. 777-00170 issued February 7, 1997.

Copies of the Portable Equipment Registration and Relocation Form and maps showing all nonattainment areas within Idaho are also enclosed. The form must be submitted to the Department at least 10 days prior to the relocation of any equipment covered by this permit.

This permit does not release POE Asphalt Paving Inc. from compliance with all other applicable federal, state, local, or tribal laws, regulations, and ordinances. With regard to collocation with another portable facility, conservative assumptions were used to derive the throughput limitations. If the throughput is too restrictive for a particular project, contact the Department prior to collocation and request a detailed, site-specific analysis.

Please pay particular attention to the reporting requirements contained in Paragraph 5 of the General Provisions, and refer to the appropriate permit number when submitting the required reports. This information is needed to properly track the progress of the permit.

Eric Kopczynski of the Lewiston Regional Office will contact you regarding a meeting with the Department to discuss the permit terms and requirements. In addition to your facility's plant manager, the Department recommends that the following representatives of your firm also attend this meeting: your responsible official, environmental contact, and any operations staff responsible for day-to-day compliance with permit conditions.

Mr. Jim Smith  
May 1, 2002  
Page 2

You, as well as any other entity, have the right to appeal this final agency action pursuant to IDAPA 58.01.23, *Rules of Administrative Procedure Before the Board of Environmental Quality*. A petition may be filed with the Hearings Coordinator, Department of Environmental Quality, 1410 N. Hilton, Boise, ID 83706-1255 within 35 days of the date of this decision. However, prior to filing a petition for a contested case, the Department encourages you to contact Dan Salgado at (208) 373-0502 to address any concerns you may have with the enclosed permit.

Sincerely,

Katherine B. Kelly  
Administrator  
Air Quality Division

This permit is issued according to IDAPA 58.01.01.200 (*Rules for the Control of Air Pollution in Idaho*), and pertains only to emissions of air contaminants regulated by the state of Idaho and to the sources specifically allowed to be constructed by this permit.

This permit (a) does not affect the title of the premises upon which the equipment is to be located; (b) does not release the permittee from any liability for any loss due to damage to person or property caused by, resulting from, or arising out of the design, installation, maintenance, or operation of the proposed equipment; (c) does not release the permittee from compliance with other applicable federal, state, tribal, or local laws, regulations, or ordinances; (d) in no manner implies or suggests that the Idaho Department of Environmental Quality (Department) or its officers, agents, or employees, assume any liability, directly or indirectly, for any loss due to damage to person or property caused by, resulting from, or arising out of design, installation, maintenance, or operation of the proposed equipment.

This permit is not transferable to another person, place, or piece or set of equipment. This permit will expire if construction has not begun within two years of its issue date or if construction is suspended for one year.

This permit has been granted on the basis of design information presented with its application. Changes of design or equipment may require Department approval pursuant to the *Rules for the Control of Air Pollution in Idaho*, IDAPA 58.01.01.200, et seq.

## LIST OF ACRONYMS

AQCR	Air Quality Control Region
CFR	Code of Federal Regulations
Department	Department of Environmental Quality
dscf	dry standard cubic feet
EPA	Environmental Protection Agency
gr	grain (1 lb = 7,000 grains)
HMA	hot-mix asphalt
IDAPA	a numbering designation for all administrative rules in Idaho promulgated in accordance with the Idaho Administrative Procedures Act
km	kilometer
lb/hr	pound per hour
O&M	operations and maintenance
PM	particulate matter
PM <sub>10</sub>	particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers
ppm	parts per million
PTC	permit to construct
PTE	potential to emit
SIC	Standard Industrial Classification
T/mo	tons per month

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: 777-00170**

**Permittee:** POE Asphalt Paving Inc.  
**Location:** Portable

**Date Issued:** May 1, 2002

**1. PERMIT TO CONSTRUCT SCOPE**

***Purpose***

This permit to construct (PTC) supersedes the following permit:

- Tier II Operating Permit No. 777-00170, issued February 7, 1997

***Regulated Sources***

Table 1.1 below lists all sources of emissions regulated in this PTC.

**Table 1.1 REGULATED EMISSION SOURCES**

<b>Permit Section</b>	<b>Source Description</b>	<b>Emissions Control(s)</b>
2	Hot-mix asphalt dryer	Baghouse
2	Screening, handling, storing, and weighing	None
3	Electrical generator set	None

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: 777-00170**

**Permittee:** POE Asphalt Paving Inc.  
**Location:** Portable

**Date Issued:** May 1, 2002

**2. ASPHALT DRYER, SCREENING, HANDLING, STORING, AND WEIGHING**

**2.1 Process Description**

The primary purpose of the emissions unit is the production of hot-mix asphalt (HMA).

**2.2 Control Description**

Emissions from the asphalt dryer are controlled by a baghouse.

***Statewide Emissions Limits***

**2.3 Asphalt Dryer Emissions Limits**

Particulate matter (PM), from the HMA dryer stack shall not exceed 0.04 grains per day standard cubic foot (gr/dscf), nor shall PM<sub>10</sub> emissions from the HMA dryer stack exceed the emission rate limit listed below.

**Table No. 2.1 EMISSION LIMITS**

POE Asphalt Paving, Inc. Lewiston, Idaho	
Source	PM <sub>10</sub>
Description	lb/hr
Asphalt Dryer Stack Outlet	9.09

lb/hr – pounds per hour

[40 CFR 60.92(a)(1), IDAPA 58.01.01.211.01]

**2.4 Other Particulate Matter Emission Limits**

Gases from systems for screening, handling, storing, and weighing hot aggregate that emanate from a stack, vent, or other functionally equivalent opening shall not contain PM emissions in excess of 0.04 gr/dscf.

[40 CFR 60.92(a)(1)]

**2.5 Opacity Limit**

Emissions from any stack, vent, or functionally equivalent opening associated with the asphalt dryer, screening, handling, storing, or weighing hot aggregate shall not exceed 20% opacity. Opacity shall be determined by the procedures contained in 40 CFR Part 60, Appendix A.

[40 CFR 60.92(a)(2)]

**2.6 Visible Emissions Limits**

Visible emissions shall not be observed leaving the property boundary for a period or periods aggregating more than three minutes in any 60-minute period. Visible emissions shall be determined by EPA Reference Method 22, as described in 40 CFR 60, Appendix A, or by a Department-approved alternative method.

[IDAPA 58.01.01.211.01]

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: 777-00170**

**Permittee:** POE Asphalt Paving Inc.  
**Location:** Portable

**Date Issued:** May 1, 2002

***Statewide Operating Requirements***

**2.7 Dryer Burner Fuel Limits**

The burner fuel shall be natural gas, No. 2 fuel oil, or waste fuel oil only.

[IDAPA 58.01.01.211.01]

**2.8 Used Oil Specifications**

The concentrations/parameters of contaminants in any used oil fuel shall not exceed the following parts per million (ppm) levels, as defined in 40 CFR 279.11:

Arsenic	5 ppm by weight
Cadmium	2 ppm by weight
Chromium	10 ppm by weight
Lead	100 ppm by weight
Total halogens	1,000 ppm by weight

[IDAPA 58.01.01.211.01]

**2.9 Fuel Oil Sulfur Content**

The sulfur content in the No. 2 fuel oil (ASTM Grade 2) supplied to the asphalt dryer shall not exceed 0.5% by weight as required in IDAPA 58.01.01.728.

[IDAPA 58.01.01.728]

**2.10 Monitoring Equipment**

The permittee shall install, calibrate, maintain, and operate, in accordance with manufacturer specifications, equipment to continuously measure the pressure differential across the air pollution control equipment and the scrubbing media flowrate to the air pollution control equipment. A scrubbing media flowrate monitor is required only if a wet scrubber is used to control some or all of the emissions from the HMA plant.

[IDAPA 58.01.01.211.01]

**2.11 Pressure Drop Across Air Pollution Control Device**

The pressure drop across the air pollution control device shall be maintained within manufacturer and Operation and Maintenance (O&M) manual specifications. Documentation of the operating pressure drop specifications shall remain onsite at all times and shall be made available to Department representatives upon request.

[IDAPA 58.01.01.211.01]

**2.12 Reasonable Control of Fugitive Emissions**

All reasonable precautions shall be taken to prevent PM from becoming airborne as required in IDAPA 58.01.01.651. In determining what is reasonable, considerations will be given to factors such as the proximity of dust-emitting operations to human habitations and/or activities and atmospheric conditions that might affect the movement of PM. Some of the reasonable precautions include, but are not limited to, the following:

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: 777-00170**

**Permittee:** POE Asphalt Paving Inc.  
**Location:** Portable

**Date Issued:** May 1, 2002

- Use, where practical, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads, or the clearing of lands.
- Application, where practical, of asphalt, oil, water or suitable chemicals to, or covering of dirt roads, material stockpiles, and other surfaces which can create dust.
- Installation and use, where practical, of hoods, fans and fabric filters or equivalent systems to enclose and vent the handling of dusty materials. Adequate containment methods should be employed during sandblasting or other operations.
- Covering, where practical, of open-bodied trucks transporting materials likely to give rise to airborne dusts.
- Paving of roadways and their maintenance in a clean condition, where practical.
- Prompt removal of earth or other stored material from streets, where practical.

[IDAPA 58.01.01.650]

2.13 Air Pollution Emergency Rules

The permittee shall comply with the Air Pollution Emergency Rules in IDAPA 58.01.01.550-562.

[IDAPA 58.01.01.550]

***Monitoring and Recordkeeping Requirements***

2.14 Monitor Operating Parameters

A compilation of the most recent two years of records shall be kept onsite and shall be made available to Department representatives upon request. The permittee shall monitor and record the throughput of the asphalt dryer in tons per month (T/mo) and tons per any consecutive 12-month period.

[IDAPA 58.01.01.211.01]

2.15 Operations and Maintenance Manual Requirements

Within 60 days after startup, the permittee shall have developed an O&M manual for the air pollution control device, which describes the procedures that will be followed to comply with General Provision 2 and the manufacturer specifications for the air pollution control device. This manual shall remain onsite at all times and shall be made available to Department representatives upon request.

[IDAPA 58.01.01.211.01]

2.16 Fugitive Dust Monitoring

The permittee shall conduct a quarterly facility-wide inspection of potential sources of fugitive emissions, during daylight hours and under normal operating conditions, to ensure that the methods used to reasonably control fugitive emissions are effective. If fugitive emissions are not being reasonably controlled, the permittee shall take corrective action as expeditiously as practicable. The permittee shall maintain records of the results of each quarterly fugitive emission inspection. The records shall, at a minimum, include the date of each inspection and a description of the following: the permittee's assessment of the conditions existing at the time fugitive emissions were present (if observed), any corrective action taken in response to the fugitive emissions, and the date the corrective action was taken.

[IDAPA 58.01.01.211.01]

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: 777-00170**

**Permittee:** POE Asphalt Paving Inc.  
**Location:** Portable

**Date Issued:** May 1, 2002

**2.17 Used Oil Monitoring and Recordkeeping**

The permittee shall perform the following in accordance with 40 CFR 279.72, for on-specification used oil fuel.

**2.17.1 Analysis of Used Oil Fuel**

The permittee shall determine that used oil to be burned for energy recovery meets the fuel specifications of 40 CFR 279.11 by performing analyses or obtaining copies of analyses or other information documenting the used oil fuel meets the specifications.

**2.17.2 Record Retention**

To demonstrate meeting the specifications for used oil fuel under 40 CFR 279.11, the permittee shall keep copies of analyses of the used oil (or other information used to make the determination) for three years.

**2.17.3 Tracking of On-specification Used Oil Delivery**

The permittee shall assure compliance with 40 CFR 279.74(b), which states that a generator, transporter, processor/refiner, or burner who first claims that used oil that is to be burned for energy recovery meets the fuel specifications under 40 CFR 279.11 must keep a record of each shipment of used oil to an on-specification used oil burner. Records for each shipment must include the following information:

- The name and address of the facility receiving the shipment.
- The quantity of used oil fuel delivered.
- The date of shipment or delivery.
- A cross-reference to the record of used oil analysis or other information used to make the determination that the oil meets the specification as required under 40 CFR 279.72(a).
- Record retention. The records described in this permit condition must be maintained for at least two years.

[IDAPA 58.01.01.211.01]

**2.18 40 CFR 60.93 Initial Performance Testing Requirements**

The permittee shall conduct a performance test on the HMA facility in accordance with 40 CFR 60.93, IDAPA 58.01.01.157, and General Provision 6 of this permit. The performance test shall be conducted to demonstrate compliance with the applicable particulate matter standards defined in 40 CFR 60.92.

If the HMA facility has previously conducted a performance test in accordance with 40 CFR 60.93 that demonstrates compliance with the applicable standards, then an additional performance test is not required by this permit condition. The permittee shall maintain a copy of the performance test results of the most recent stack test conducted on this asphalt facility. This report shall be made available to the Department representatives upon request.

[IDAPA 58.01.01.157]

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: 777-00170**

**Permittee:** POE Asphalt Paving Inc.  
**Location:** Portable

**Date Issued:** May 1, 2002

***Reporting Requirements***

**2.19 Certification of Documents**

All documents submitted to the Department, including, but not limited to, records, monitoring data, supporting information, requests for confidential treatment, testing reports, or compliance certifications shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document(s) are true, accurate, and complete.  
[IDAPA 58.01.01.123]

**2.20 Performance Test Protocol**

Prior to conducting any emission test, the permittee is strongly encouraged to submit in writing to the Department, at least 30 days in advance, a performance test protocol in accordance with IDAPA 58.01.01.157.01.a.

[IDAPA 58.01.01.157.a]

**2.21 Performance Test Report**

In accordance with IDAPA 58.01.01.157.04, the permittee shall submit a written report of the performance test results to the Department within 30 days of completion of the test.

[IDAPA 58.01.01.157.04]

***Operating Requirements - Attainment or Unclassifiable Area When Not Collocated***

The permittee shall comply with Permit Conditions 2.3 through 2.21 and the following permit conditions when the HMA facility is operated in any attainment or unclassifiable areas, and when it is not collocated, within the state of Idaho.

**2.22 Throughput Limits**

The maximum annual throughput of the asphalt dryer shall not exceed 1,290,728 tons per any consecutive 12-month period when located in any attainment or unclassifiable area.

[IDAPA 58.01.01.211.01]

**2.23 Collocation Requirements**

When the HMA facility is to be collocated with another portable HMA plant, rock-crushing plant, or concrete batch plant, the collocation requirements of Permit Conditions 2.24 through 2.26 must be complied with.

[IDAPA 58.01.01.211.01]

***Operating Requirements - Attainment or Unclassifiable Area When Collocated***

The permittee shall comply with Permit Conditions 2.3 through 2.21 and the following permit conditions when the HMA facility is to be collocated with another portable HMA plant, rock-crushing plant, or concrete batch plant within the state of Idaho. The HMA facility may only collocate with either one portable rock-crushing plant, one portable concrete batch plant, or one portable HMA plant that has been permitted to specifically allow collocation.

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: 777-00170**

**Permittee:** POE Asphalt Paving Inc.  
**Location:** Portable

**Date Issued:** May 1, 2002

**2.24 Collocation Areas**

The HMA facility may collocate in attainment or unclassifiable areas only. The permittee shall not collocate in a nonattainment area, or proposed nonattainment area, without obtaining a permit that specifically allows for collocation in a nonattainment area.

[IDAPA 58.01.01.211.01]

**2.25 Number of Portable Sources**

The HMA facility may only collocate with either one portable rock-crushing plant, one portable concrete batch plant, or one other portable HMA plant which has been permitted to specifically allow collocation.

[IDAPA 58.01.01.211.01]

**2.26 Throughput Limits**

The maximum annual throughput of the asphalt dryer shall not exceed 645,364 tons per any consecutive 12-month period when collocated in any attainment or unclassifiable area with another HMA plant, concrete batch plant, or rock-crushing plant.

[IDAPA 58.01.01.211.01]

***Operating Requirements - Nonattainment Area***

The permittee shall comply with Permit Conditions 2.3 through 2.21 and the following permit conditions when the HMA facility is operated in any PM<sub>10</sub> nonattainment area within the state of Idaho. While operating the HMA facility under the conditions set forth in Permit Conditions 2.27 and 2.28, the HMA facility may not collocate with any other facility.

**2.27 Throughput Limits**

The maximum annual throughput of the asphalt dryer shall not exceed 1,290,728 tons per any consecutive 12-month period when located in any PM<sub>10</sub> nonattainment area or proposed PM<sub>10</sub> nonattainment area.

[IDAPA 58.01.01.211.01]

**2.28 Collocation Requirements**

The HMA facility shall not be collocated with another portable HMA plant, rock-crushing plant, or concrete batch plant when located in any PM<sub>10</sub> nonattainment area or proposed PM<sub>10</sub> nonattainment area.

[IDAPA 58.01.01.211.01]

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: 777-00170**

**Permittee:** POE Asphalt Paving Inc.  
**Location:** Portable

**Date Issued:** May 1, 2002

**3. ELECTRICAL GENERATOR**

**3.1 Process Description**

The primary purpose of the emissions unit is to provide electrical power for use by the HMA facility.

***Statewide Operating Requirements***

**3.2 Generator Fuel Limits**

The generator fuel shall be diesel fuel only.

[IDAPA 58.01.01.211.01]

**3.3 Fuel Oil Sulfur Content**

The sulfur content in the No. 1 fuel oil (ASTM Grade 1) supplied to the generator shall not exceed 0.3% by weight as required in IDAPA 58.01.01.728. The sulfur content in the No. 2 fuel oil (ASTM Grade 2) supplied to the generator shall not exceed 0.5% by weight as required in IDAPA 58.01.01.728.

[IDAPA 58.01.01.728]

***Monitoring and Recordkeeping Requirements***

**3.4 Monitor Generator Hours of Operation**

The permittee shall monitor and record the generator's hours of operation on a monthly basis if the generator hours of operation are limited in Permit Conditions 3.6 through 3.12. A compilation of the most recent two years of records shall be kept onsite and shall be made available to the Department representatives upon request.

[IDAPA 58.01.01.211.01]

***Reporting Requirements***

**3.5 Certification of Documents**

All documents submitted to the Department, including, but not limited to, records, monitoring data, supporting information, requests for confidential treatment, testing reports, or compliance certifications, shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document(s) are true, accurate, and complete.

[IDAPA 58.01.01.123]

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: 777-00170**

**Permittee:** POE Asphalt Paving Inc.  
**Location:** Portable

**Date Issued:** May 1, 2002

***Operating Requirements - Attainment or Unclassifiable Area When Not Collocated***

The permittee shall comply with Permit Conditions 3.2 through 3.5 and the following permit condition when the HMA facility is operated in any attainment or unclassifiable areas, and when it is not collocated, within the state of Idaho.

**3.6 Generator Hours of Operation**

The generator shall not be operated more than 4,302 hours per any consecutive 12-month period when located in any attainment or unclassifiable area.

[IDAPA 58.01.01.211.01]

***Operating Requirements - Attainment or Unclassifiable Area When Collocated***

The permittee shall comply with Permit Conditions 3.2 through 3.5 and the following permit conditions when the HMA facility is to be collocated with another portable HMA plant, rock-crushing plant, or concrete batch plant within the state of Idaho. The HMA facility may only collocate with either one portable rock-crushing plant, one portable concrete batch plant, or one portable HMA plant that has been permitted to specifically allow collocation.

**3.7 Generator Hours of Operation**

The generator shall not be operated more than 2,151 hours per any consecutive 12-month period when collocated with another HMA plant, concrete batch plant, or rock-crushing plant.

[IDAPA 58.01.01.211.01]

***Operating Requirements - Nonattainment Area***

The permittee shall comply with Permit Conditions 3.2 through 3.5 and the following permit condition when the HMA facility is operated in any PM<sub>10</sub> nonattainment area within the state of Idaho. While operating the HMA facility under the conditions set forth in Permit Condition 3.8, the HMA facility may not collocate with any other facility.

**3.8 Generator Hours of Operation**

The generator shall not be operated more than 4,302 hours per any 12-month consecutive period when located in any PM<sub>10</sub> nonattainment area or proposed PM<sub>10</sub> nonattainment area.

[IDAPA 58.01.01.211.01]

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: 777-00170**

**Permittee:** POE Asphalt Paving Inc.  
**Location:** Portable

**Date Issued:** May 1, 2002

**4. PERMIT TO CONSTRUCT GENERAL PROVISIONS**

1. All emissions authorized herein shall be consistent with the terms and conditions of this permit and the *Rules for the Control of Air Pollution in Idaho*. The emissions of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit and the *Rules for the Control of Air Pollution in Idaho*, and the Environmental Protection and Health Act, Idaho Code §39-101, et seq.
2. The permittee shall at all times (except as provided in the *Rules for the Control of Air Pollution in Idaho*) maintain in good working order and operate as efficiently as practicable, all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable Idaho laws for the control of air pollution.
3. The permittee shall allow the Director, and/or the authorized representative(s), upon the presentation of credentials:
  - 3.1 To enter, at reasonable times, upon the premises where an emissions source is located, or in which any records are required to be kept under the terms and conditions of this permit.
  - 3.2 At reasonable times, to have access to and copy any records required to be kept under the terms and conditions of this permit, to inspect any monitoring methods required in this permit, and require stack emissions testing in conformance with IDAPA 58.01.01.157 when deemed appropriate by the Director.
4. Nothing in this permit is intended to relieve or exempt the permittee from compliance with any applicable federal, state, or local law or regulation, except as specifically provided herein.
5. The permittee shall notify the Department, in writing, of the required information for the following events within five working days after occurrence:
  - Initiation of Construction - Date
  - Completion/Cessation of Construction - Date
  - Actual Production Startup - Date
  - Initial Date of Achieving Maximum Production Rate - Production Rate and Date
6. If emissions testing is specified, the permittee must schedule such testing within 60 days after achieving the maximum production rate, but not later than 180 days after initial startup. Such testing must **strictly** adhere to the procedures outlined in IDAPA 58.01.01.157 and shall not be conducted on weekends or state holidays without prior written approval from the Department. Testing procedures and specific time limitations may be modified by the Department by prior negotiation if conditions warrant adjustment. The Department shall be notified at least 15 days prior to the scheduled compliance test. Any records or data generated as a result of such compliance test shall be made available to the Department upon request.

The maximum allowable operating rate shall be limited to 120% of the average operating rate attained during any performance test period, for which a test protocol has been granted prior approval by the Department, unless (1) the test demonstrates noncompliance; (2) a more restrictive operating limit is specified elsewhere in this permit; or (3) at such an operating rate, emissions would exceed any emissions limit(s) set forth in this permit.
7. The provisions of this permit are severable, and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.
