Air Quality Index

Range		Category	Meaning
0 to 50		Good	Air quality is considered satisfactory, and air pollution poses little or no risk
51 to 100		Moderate	Air quality is acceptable; however, for some pollutants there may be a moderate health concern for a very small number of people who are unusually sensitive to air pollution.
101 to 150		Unhealthy for Sensitive Groups*	Members of sensitive groups may experience health effects. The general public is not likely to be affected.
151 to 200		Unhealthy	Everyone may begin to experience health effects; members of sensitive groups may experience more serious health effects.
201 to 300		Very Unhealthy	Health alert: everyone may experience more serious health effects.
301 to 500		Hazardous	Health warnings of emergency conditions. The entire population is more likely to be affected.
