North Idaho Air Quality Forecast & Burn Advisory

**Forecast for Saturday, July 21, 2018 through
Monday, July 23, 2018**

Forecast Discussion: The mostly dry weather looks to persist into next week, with the potential for another strong warming trend. Air quality will be in the MODERATE to GOOD range for all areas over the weekend depending on winds and fire activity. **Fire safety restrictions are in place in many areas. Contact your local fire protection district prior to conducting any open burning.** Smoke from wildfires around the western U.S. and Canada can move into the area and degrade air quality quickly. **Be aware of changing conditions to protect your health.**
