

Calibration and Model acceptance

Proposed Goals

Darcy Sharp, DEQ Technical Services State Office

Darcy.Sharp@deq.idaho.gov

208-373-0133

5/28/2013 DEQ Conference Room D

Proposed Goals

- * Velocity within 0.1 m/sec
- * Water level within 10 cm
- * Temperature within 1°C
- * Dissolved oxygen <2 mg/L in eutrophic system
- * Nutrient and algal concentration within 10-25% of the range of the field data

RMSE accentuates the biggest outliers
AME averages the big outliers

Time and Resource commitments

- * DEQ Technical Services
- * DEQ Regional Office
- * EPA
- * USGS
- * Municipalities

Status

Water Quantity

- * COB Lander and West estimated for April 2013 as avg of flow 1/1/12 - 4/1/13
- * Flows for IDFG Eagle Fish Hatchery uses original Aquatox flow of 32 cfs.
- * Fifteenmile Creek flow? Set at constant 100 cfs. Need to review available data for 2012 flows.
- * Middleton WWTF flow? Set at constant 0.8 cfs.
- * Caldwell WWTF flow? Set at constant 12.2 cfs.
- * Indian Creek flow? Set at constant 25 cfs. Need to review available data for 2012 flows.
- * Zero unaccounted/groundwater flow into Segment 12, all into Segment 13, don't know if should be split.
- * Groundwater inputs for all unaccounted flows. No other estimates used for groundwater, such as Schmidt estimates used previously. Rely on USGS information rather than Schmidt. No change.

Status

Water Quality

- * Only water quality data see for model simulation period are the following. Are there other data for the period? Where?
 - * 8/21/12
 - * 10/29/12
 - * 3/4/13
 - * Asked Kate and Kate replied; have not updated to her response.
- * Have not seen Chlorophyll a data for the model simulation period. Are data available? Where?
 - * Asked Kate and Kate replied; have not updated to her response.
- * What is zMean input? Text includes the following. Need to update? Need to look at other spreadsheets?
 - * Uses RAP Depth Discharge 1-98 to 9-02
 - * Depth Discharge calibration.xls
 - * Probably should look at stage data and build depth discharge spreadsheet.

Status

Water Quality

- * Need to update Shade? Have data/basis? Set at zero, maintain for now. No change.
- * Most to all of the tribs do not have BOD data, need?
- * IDFG WQ data?
- * Middleton WWTF data? Text includes Data from Basil Tupyi, Holliday Engineering
- * Not sure have data for NMD and SMD (N. Midd. Drain and S. Midd. Drain)?
- * Not sure have data for Mason Drain?
- * Not sure have data for Hartley Drain?
- * Unclear what data goes into some of the Segment numbers and why?
- * Groundwater water quality unchanged
