Name
Organization
Address
City, State

Dear participant:

This letter is to inform you that the Idaho Department of Environmental Quality (DEQ) is in the process of developing a Watershed Advisory Group (WAG) to assist in the development and implementation of a plan known as a Total Maximum Daily Load (TMDL), to improve water quality in upper Hangman Creek. The upper Hangman Creek TMDL will address the State of Idaho portion of the Hangman Creek watershed and does not address parts of the watershed on tribal lands or in the State of Washington. While this upper Hangman Creek TMDL effort will address the State of Idaho portions of the watershed, it will be coordinated with TMDLs being developed for the State of Washington and tribal lands of the Hangman Creek watershed.

You are being sent this letter because your name has been suggested as a participant in the development of the TMDL. Enclosed is a brief introduction to TMDL water quality plans, a list and a map of those stream segments and pollutants in the upper Hangman Creek watershed that will be addressed by the WAG and DEQ. In addition, I have enclosed a brief survey for you to complete that will help us develop this plan.

DEQ is operating under a new law regarding duties of DEQ and of the WAGs to work in consultation on the draft Subbasin Assessments and TMDLs. Basically, there is a desire to ensure diverse and full participation from citizens in the watershed and full disclosure of all analysis by the DEQ. The information requested on the enclosed form relates to the public involvement process requirements and also enables us to initiate the WAG and TMDL process as efficiently as possible. More information on the public involvement process and related WAG and DEQ responsibilities will be provided at the first meeting.

I hope that you are interested in participating in the Hangman Creek WAG. Please take a few minutes to complete the enclosed survey. In addition, I will be calling you in the next few weeks to touch base regarding your participation, available information, and to determine an appropriate meeting time and place. If you have any questions or comments, please do not hesitate to contact me at the DEQ office in Coeur d'Alene or via e-mail (tyson.clyne@deq.idaho.gov or 208-769-1422).

I look forward to meeting and working with you in the future.

Sincerely,

Tyson Clyne
Watershed Coordinator
