

The primary topics of this first TAC are:

1. Establish workgroups for each pollutant source category:
  - a. Point sources (municipal and industrial wastewater)
  - b. Stormwater
  - c. Urban (dry weather flows conveyed via stormwater systems)
  - d. Agriculture, and
  - e. On-site disposal (septic) systems
2. Further discussion as needed on the draft outline of the plan presented at the last LBWC regular meeting
3. Establish the schedule for follow up TAC meetings
